ters, With Kotor, by Kremlin, as His Premier Sire.

MR. BELLAMY'S FAST PACERS

Virginia-Bred Trotters Doing Well-La Jolla and Telka.

Jockey Club's Meeting. horses are kept there. Kotor, horses are kept there. Kotor, butty-made bay stallion, five oid, by Kremiln, 2:07-3-4, has it his stud season and is now ye training. His dam is Allene, 'Metallie, 2:20 by Kentucky second dam of Alna, 2:28-3-4, subtraction to and she out of Dr. Whitsker, who well-known get her breeding. The well-known black pacing mare Wilhelmina, 2:17 1-4, by Kentucky Ruler, Jr., dam Topsy, the dam of Rozinanti, 2:23 1-4, is now being driven by the Doctor in his practice, and her manners are greatly improved, as while formerly she took a desperate hold of the bit, it is now ne trouble to jog her on a loose rein. An effort will be made to give her a lower record this fall, and then she will be retired to the breeding ranks.

Two of the richest bred and most highly prized brood mares in Virginia are La Jolla, the gray daughter of Advertiser, 2:15%, and famous old Sally Benton, 2:17%, and Telka, a shapely bay, by Arlon, 2:07%, dam La Jolla, Telka has been bred to Bow Axworthy, 2:23%, son of Axworthy and Mystic, dam of Fred Kohl, 2:07%, as will La Jolla later on. The latter is now with foal by Admiral Dewey, 2:94%. Both mares are owned by A. B. Lewis, the New York banker and broker, who owns the fine estate of over 2:006 acres, beautifully located on the Rappahamock river, near Fredericksburg, Va., where Jersey cattle and trotting horses are bred quite largely. J. T. Carpenter, formerly with the Hood Farm, Lowell, Mass., is the manager, while M. F. Hanson, who was with Floyd Brothers. Bridgetown, Va., for some years has been engaged to handie the trotters owned at the farm.

farm.

Expenditures are being made with a proces, buy gelding, 7, by Brown Hal, 2.12½, dam Mattle P., dam of Max-millian, 2.10½, etc., by Prince Puluski, with his owner, S. C. Beilamy, of English N. C., up.

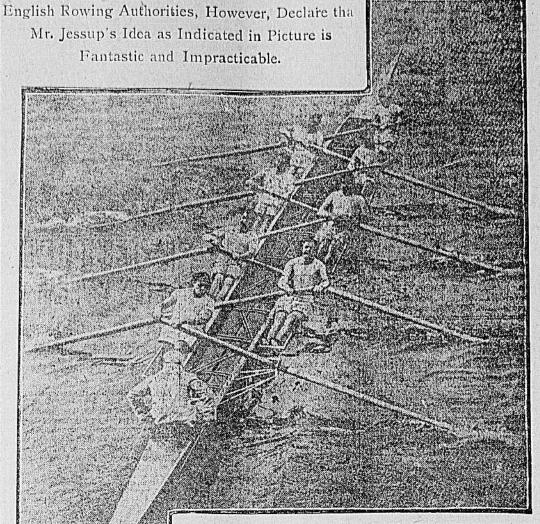

Stockwell, he pain \$15,000, a l's record auction price, while on it is likely that a trotting of note will be purchased to head stud, which already includes iters of Hingon, 2:064; Arion, : Advertiser, 2:15/4; Sable as, 2:18, and other famous stal-

CHANGING NOW

American Followers of Sport Feel That Time Is Ripe for Amendment.

The Western Golf Association ha mounced conditions for its annua mateur championship tournament t

To Place Carsmen Outside the Boat Is Latest Wrinkle in Aquatics

of several championship singles, to

the measure at present, to 5 feet 8 attempts at modifying the actual inches. With an oar measuring 12 feet to 12 feet 3 inches all over you would have an enormous excess of leverage. You would have to increase the length of your oar outboard and the breadth as the Snubnosed ship, or 'Snubby' for short.

"Consequently, she carried her bows "Consequently" "Consequently

an oar measuring nearly 19 feet. It is quite hard enough, even under the present conditions, for ordinary human beings to row a racing stroke. With the new implements necessitated by Mr. Jessup's invention, you might have a crew rowing with a lightning stroke of about eight to the minute during those orief periods when they would remain attoat.

"The whole thing is fantastical.
"Since sliding seats came into general use, the modifications in the general lines of a racing boat and in the decisis of her fitting have been gradually extended from 8 or 9 inches to 15 inches in this country, and to 20 or 21 inches in certain foreign countries, and the length of the ship itself, and we have now fave nearly 19 feet long to constitute a first and we have now fave allowance of the long to each long the largest in the bows. The boat in which larvard raced against Cambridge last year was considerably shorter than but of their opponents. She was built but of proponents. She was built but of their opponents. She was considerably shorter than he that of their opponents. She was built but of their opponents. She was considerably shorter than the bows. The boat in which larvard raced against Cambridge last year was considerably shorter than the bows. The boat in which larvard raced against Cambridge last year was considerably shorter than the bows. The boat in which larvard raced against Cambri to me its how is the made strong enough? way known to me by edone.

Is no amount of stablave seen in a racing it prevent it rolling to nt occasionally during to theory of stability has which will prevent his bing as to immerse the fety—soats, stretchers that his boat is to be lit water, but you can't made and in the stroke side in the lefty—soats, stretchers that his boat is to be lit water, but you can't made a strong which the ship is built has not varied to any material extent.

"The whole thing is fantastical.

"Since sliding seats came into gengral use, the modifications in the gengral use, the modification in the gengral use, the modification in the gengral use, the modifications in the gengral use, the modification in the gengral use, th

Alternately—seats, stretchers of the case that his boat is to be a find an ownich the ship is built has been for smooth and another in the boat for smooth and another in the course you may have the course you may have the course you may have the risk of the young for those days, had not have rounded the bend, you risk a lead wind which will stormly sea against you. Are leap out of the boat at Ham the stern of the course of the course of the course of the course?

The span That is in the tremensith required for the oars. In believe there is any human which could wield the oars restored to the forth of the boat. If, as Mr. Jessup 2s. you put an extra leverage to the feet on the oars, you will then the third parts happed stern and rudder the feet on the oars, you will then the third parts happed stern and rudder the feet on the oars, you will then the third parts happed stern and rudder the rudder, though there have been worked out. It might possibly be done, but the clements of the calculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult, for the racing boat has to be acculation are complicated and difficult.

The same very lower to the course, was the lines of a xinch the calculation are complicated

There will be several added horses out to the Saratoga Handleap sent the sorted the several added horses to the Saratoga the several added. The winner will come from the above table of entrants.

By J. S. A. MACDONALD.

NEW YORK, August 3.—The clatter of the hoof-beats down the quarter stretch, the rustle of Dame Fashion's silks, and the gentle whire of the roulette ball, while well-groomed sportsmon ply their luck under soft, glowing green lamps, will signalize to the mind of the average clitzen of Saratoga Springs, N. Y., some time on Monday, the fact of the annual "Saratoga sporting season" having arrived. Commencing on Monday, August 5th, and running until August 29th, the Spa will see the sporting faithful entering their paradise, for that is the length of the racing period of the Saratoga Association for the Improvement of the Breed of Racchorses, with its attendant show of fashion and money. For twenty-three days will King Thoroughbred reign at the Spa. after which comes a return to Sheepshead Bay, with the running of the \$40,000 Puturity and the lauguration of the autumn racing season about New York. The Saratoga Association is spreading forth a brilliant fare for both the owner and the casual visitor at the trackside, as may be discerned by the amount of money offered for competition. Including all stake money, overnight purses and special sporting races, the tremendous sum of \$411,255 will be distributed this season at the Spa. Among the noted and richly endowed fixtures on the month's calendar are the Saratoga Derby and the Saratoga Verley and the Saratoga Verley and the Saratoga Cup of August 24th.

THE RURAL SCHOOL

AS A SOCIAL CENTRE

The school must offer vocational training. This does not mean that every school shall be a trade school. It does not even mean that the school shall abm specifically to teach trades. It does mean, however, that we will come to realize that the schools in preparing the pupils for complete living must bear in mind the fact that yocation is a large part of life. Consequently vocational training in its broadest possible aspects must be one of the largest phases of school activity. This may not mean the introduction of elementary agriculture into all the rural schools, but it will mean the utilization of agricultural material in the training of the pupil, so that if he enters the agricultural vocation he will be adequately prepared for it. The school association the spirit of social or community service. I know of nothing better in this line than the plan used in Maine of organizing school improvement leagues. It is desirable also for the school to become a social centre, or at least one of the social centres, of the neighborhood. The school ought of play a large part in the iff of the mature people of the community, and it may well act as a sort of rallying centre for the educational interest of adults as well as of children. The school must definitely co-operate with other institutions of the community, and it has connection there should be frequent joint meetings of teachers and school patrons for the discussion both of school topics and f subjects of general community interest.—President K. L. Butterfield, of Massachusetts Agricultural College, in Lesile's Weekly.
